An introduction to the FESC

What We Do

The consortium assists the state in the development of an environmentally compatible, sustainable, and efficient energy strategic plan.

OUR MISSION

Through collaborative research and development across the State University System and the industry, the goal of the **FESC** is to become a world leader in energy research, education, technology, and energy systems analysis.

In so doing, the consortium shall:

A.

Coordinate and initiate increased collaborative interdisciplinary energy research among the universities and the energy industry.

B.

Assist in the creation and development of a Florida-based energy technology industry through efforts that would expedite commercialization of innovative energy technologies by taking advantage of the energy expertise within the State University System.

C.

Provide a state resource for objective energy systems analysis.

D.

Develop education and outreach programs to prepare a qualified energy workforce and informed public.
